

Admin panel script for my presentation

1. User Uploads Resume:

- **Step 1:** The user visits the resume upload page and selects their resume file.
- **Step 2:** The user clicks the "Upload" button, and the resume file is sent to the server.
- **Step 3:** On the server, the resume is saved in a folder, and its details (filename, original name, and upload date) are stored in the database.
- **Step 4:** After successful upload, the user gets a confirmation message:
"Resume uploaded successfully!"

2. Admin Logs In:

- **Step 1:** The admin goes to the **Admin Login page**.
- **Step 2:** The admin enters their **username** and **password** and clicks the "Login" button.
- **Step 3:** The login details are sent to the server for authentication.
- **Step 4:** If the credentials are correct, the admin is successfully logged in and redirected to the **Admin Panel**.

3. Admin Views Uploaded Resumes in the Admin Panel:

- **Step 1:** After logging in, the admin accesses the **Admin Panel**.
- **Step 2:** The admin can see a table listing all the uploaded resumes.
 - The table includes:
 - **Resume ID**
 - **Original Filename**
 - **Upload Date**
 - A **Download Link** to view or download the resume
